

DATA SHEET

Super White Static Film is a PVC Film, that sticks / clings to smooth gloss surfaces such as glass, smooth plastic and shiny metal surfaces. It sticks to these surfaces without any adhesive and can be removed without leaving behind any residue. Applications such as signs, decals, window graphics, door covering, protective masking and much, much, more.

Characteristic

Description	Super Static Film White	Super Static Film Transparent
PVC Face film	0.13 um±0.01 mm	
Face Film weight	195 g/sq.m	
PVC film type	White monomeric vinyl	Transparent monomeric vinyl
PVC Film Finish	Glossy	
First tack stick test	86 N/m (Test while adhering to stainless steel)	
Release paper weight	140 g/sq.m	
Paper thickness	0.12 mm	
Product width	1.27 m	
Light transmission	93%	
Temperature	3 °C ~ + 38°C	
Ink	SOLVENT - ECO - LATEX - UV	
UV Resistance	Excellent	
Application temperature range (air and substrate)	3 °C ~ + 38°C	
Expire time	12 months
