

DATA SHEET

Floor graphics is made up of floor vinyl and floor lamination. Floor vinyl with printable face film, to be anti-slip on the floor, is designed with texture on the surface of the face film. Floor lamination with textured transparent face film, can be either printable or laminate on images directly, depending on customers demand. Both items can be well used for ground orientation identification, indoor ground advertising, road show smooth ground display, etc.

Features:

1. Good printing color saturation
2. Waterproof, anti-slip and anti-friction

Characteristic

Description	Floor Graphics
Face Film	0.20 um±0.01 um
Face film weight	280 g/sq.m
PVC Film shrink rate	± 0.5%
